

GUIDE

Plan Management Type Explainer

Guide no. MC-P076-C01 Version 1.0 Linked policy MC-P076 Management of NDIS Supports

How to use this guide

Use with a participant who is not sure how their plan is managed, or who wants to change. Give them a copy.

The three ways an NDIS plan can be managed

Type	Who pays the providers	What it means for the participant
NDIA managed	The NDIA pays providers directly	The participant can only use NDIS registered providers. No invoices to handle
Plan managed	A plan manager pays providers from the plan	The participant can use registered and unregistered providers. The plan manager is funded separately and does the paperwork
Self managed	The participant pays providers and claims back	The most choice and the most responsibility, including keeping records and receipts

Things to think about

- how much paperwork the participant wants to do
- whether they want to use providers who are not registered
- whether they want help to manage the money, and who from
- that they can ask the NDIA to change the management type at a plan reassessment, or earlier if things change
- that a participant can have different parts of their plan managed in different ways

Makodah Care is not a plan manager

Makodah Care does not hold, pay out or claim a participant's NDIS funding on their behalf. If a participant wants a plan manager, the coordinator gives them options to choose from.
